## FOR IMMEDIATE RELEASE

### Hunt Electric Earned Platinum Safety Excellence Award

Salt Lake City, Utah (March 26, 2010) - Hunt Electric, Inc. has joined 27 other contractors from the state of Utah, in receiving the prestigious Platinum Safety Excellence Award, presented at the annual Association of General Contractors (AGC) Safety Conference held at Thanksgiving Point on March 26, 2010. The Platinum Safety award is given to members who have an incident rate 25% below each division's average and complete a detailed review of the company's safety history.

The AGC has been recognizing its members for Safety Excellence since 1926. The National AGC Safety Awards (NASA) program has been an ongoing effort to offer AGC members an opportunity to evaluate their safety record. NASA compares a member's safety record with other AGC members according to the member size and construction type. Additionally, NASA provides a great opportunity for contractor members to compete for nationally recognized awards that have excellent safety records.

Employees at Hunt Electric recently surpassed 1,200,000 safe work hours and have worked since August 31, 2007 without a lost-time injury. This means Hunt Electric operations have not had any injuries that resulted in an employee spending time away from work. Each employee's contribution to working safely during 2009 is recognized and applauded by this award.

Nathan Clark, Hunt Electric Safety Director, emphasizes that a strong safety culture is a vital key in protecting each employee, as well as attracting future work with General Contractors who seek companies to work with who share their safety values.

## About Hunt Electric
